

Albutt A053-76 Bucket

Description

c/w standard Kramer KT276 brackets.

The Albutt A053-76 is a 7'6" (2.29m) wide rehandling bucket designed for telehandlers and loaders, featuring a 1.5m³ capacity and robust construction. It is commonly used for handling materials like grain or muck, featuring a rolled back, Boron 500 corner heel pads, and full-depth side stiffeners for durability.
