

## IforWilliamsTrailers GP

### Description

For further information and current delivery times, please contact Ripon Trailer Centre - 01765 698948

The GP series trailers, widely regarded as the toughest plant trailers in the industry, have an open rectangular steel framework, integral with the chassis. Maximum gross weight of the range is 3500kg. Models range from the smallest GP106 to the largest GP146. Trailers are offered with three tyre options and larger models are also available as tri-axle versions.

GP models are fitted with a tough resin-coated plywood platform. Various options are also available including factory fitted aluminium treadplate floor covering, bolt on ramp knife edge and 1.8m/6' skids or ramp in place of the standard size of 1.2m/4'. All our plant trailer models are

fitted with integrated ramp or skid supports. This standard feature ensures trailers are supported whilst being loaded without the need to deploy prop stands.
