

## Kuhn BTF - BTFR

### Description

Rigid and foldable seeding bars with working widths of 3.00 to 6.00m. They make an effective combination when coupled to a power harrow and TF 1512 front hopper. These seeding bars are equipped with SEEDFLEX seeding units: offset double disc on a parallelogram system. BTF and BTFR SERIES seeding bars ensure optimum work output with great soil/seed contact to ensure the germination of your crops. In combination with the TF 1512 front hopper and power harrows you get a truly versatile seeding combination equipped with cutting-edge technology but simple to use. Remember that 50 % of your harvest is already determined during seeding. The SEEDFLEX seeding bar will manage this to your satisfaction, even at fast ground speeds.
