

## Kuhn COMBILINER INTEGRA

### Description

The integrated mechanical seed drills INTEGRA 3003 and INTEGRA 4003 with a working width of 3.00 and 4.00 m are fitted with Suffolk or double disc coulters. They have a capacity of up to 1200 l with extension and feature the HELICA distribution. Robust, compact and with great autonomy, the COMBILINER INTEGRA meets your competitiveness and profitability requirements while providing you with an unparalleled seeding precision. Two seed delivery systems provide you with the seeding precision and the versatility you are looking for, offering the optimal solution to meet your needs through customized adaptation to your crops, soils and production systems. KUHNS HELICA distribution with helical volumetric flutings doses precisely from 1.5 to 450 kg/ha, irrespective of vibration or ground contours. Seeding is completely guided by the roller for even more regular results and an improved protection of all combination parts (depending on the equipment chosen). To meet your requirements and

conditions, the INTEGRA mechanical seed drill is available in double-disc or Suffolk coulter version.
