

Kuhn HAYBOB

Description

The KUHN HAYBOB Series is well suited to small to medium sized farms. These universal haymakers are made from heavy-duty components to give the machine a long life. Both HAYBOB models are easy to adjust and operate. The KUHN HAYBOB 300 and 360 tedder-rake combinations are universal haymakers, ideally suited for small to medium sized farms. The HAYBOB offers excellent performance in a wide range of crops like grass and delicate legume hay crops, and provides thorough tedding to uniformly spread wet crops for faster drying. Easily converted from tedding to raking, these machines provide gentle crop handling and produce fluffy, well-formed swaths.

The HAYBOB provides a practical and economical alternative for producers who wish to save the cost of multiple specialised machines or make their first steps in mechanisation of their

farm practices. The HAYBOB 300 model offers tedding and central swath raking with a 3 meter working width. The HAYBOB 360 offers tedding and side swath delivery raking with a working width of 3.6 meters.
