

## Kuhn PF

### Description

The PF front-end sprayer is not just a simple front-mounted tank; it is a complete and independent sprayer. The combination of the PF and rear DELTIS<sup>2</sup> or ALTIS<sup>2</sup> sprayer can increase your autonomy by up to 100%. The combination of the rear sprayer + PF front-mounted sprayer offers capacities from 2,300 to 3,500 litres, with the performance of today's tractors. This assembly represents an economical solution compared to a self-propelled sprayer with the same capacity. The 1,000 or 1,500-litre PF front-mounted sprayer offers optimum distribution of weight on the tractor to maintain excellent stability, even on sloping terrain.
