

Kuhn PRIMOR 2060 M MOUNTED

Description

The PRIMOR 2060 M straw-blower & feeder is a multi-functional machine capable of handling long fibres, such as hay and haylage, thanks to the patented POLYDRIVE system which drives the separator.

The result is quality bedding and guaranteed comfort for your animals: the pneumatic separating chamber concept ensures that straw is spread evenly over the full depth of the bedding area, at distances of up to 18m. The strands of straw are preserved for long litter life.
