

Kuhn PROFILE 2 CS TWIN-AUGER

Description

The PROFILE 2 CS mixers have 2 vertical augers, a narrow hopper and feed out via a cross-conveyor. Available in 14 to 20 m³ capacities, these machines are suited to herds of between 70 and 150 cattle. The countless distribution configurations make this new range of PROFILE twin-auger vertical mixer wagons unique. Due to awkward building configurations, many farms have been unable to switch to mixed rations. The PROFILE twin-auger vertical mixer wagon ranges offer practical solutions.

The two augers driven on the same driveline, mix the product in a figure-of-eight pattern, which allows for optimum product flow in the tub, with no blockages and no additional power

requirement. Like the PROFILE single auger mixer wagons, the wide distribution doors (1100 mm) ensure a quick clean-out of the entire tub.
