

## Kuhn PZ 270-300

### Description

With the PZ 270 F and PZ 300 F models, KUHN sets the standard in this sector. The drum arrangement, FLEXPROTECT side protection and overall accessibility have yet to meet their match. The mower unit attachment with two large outer drums and two small inner drums ensures maximum throughput for the forage. In this way, you can deposit a double swath that can be easily picked up by any following machines. Using the generously dimensioned swath discs, the finest of adjustments can be made: either narrow swath (90 cm) for day-to-day gathering of forage on sloping terrain, or wide swath for hay.
