

Kuhn PZ 8831

Description

High capacity with a low power requirement is what characterises the KUHN PZ 8831 Triple Drum Mower. Due to its compact design and low power requirement the machine is suitable for tractors as from 85 kW (116 hp). If you want to mow wide working widths of up to 8.84 m, then the PZ 8831 is the right drum mower combination for you. Farms with tractors as from 85 kW (116 hp) can now achieve maximum mowing widths, and therefore the highest work rates.

With the legendary drum design of more than 25,000 front and rear mounted mowers sold worldwide; these mower units have proven themselves in real, tough operating conditions. One special feature is its arrangement of mower drums: large outer drums and small inner drums produce a swath form to match the intake and follow the contours of the land perfectly.

The freely rotating saucers make this mower very easy to tow.

The PZ 8831 is fitted as standard with LIFT-CONTROL. This hydro-pneumatic suspension system continually ensures a uniform ground pressure, lower pulling power requirement and non-stop mowing.
