

Kuhn UKS

Description

UKS universal spreaders are intended for vineyards, orchards, market gardens but also nursery gardens or greenhouses. It is also possible to use them to spread salt or sand on walkways, car parks, streets? Their characteristic feature is a total versatility of use, which enables spreading all products available on the market : powder, granular, compacted or crystalline fertiliser, organic manure in bulk or pellets, lime, sand, seeds (ray-grass, mustard for example), micro-granules, salt or fine gravel for road maintenance.
