

Kuhn VARI-MANAGER

Description

The VARI-MANAGER semi-mounted plough range is suitable for medium-power tractors with a larger number of bodies than a mounted plough.

Its manoeuvrability, with its 110° turning angle, makes it possible to plough in the smallest fields whilst still retaining high work outputs. It perfectly meets the requirements of farmers who are looking for:

- Simplicity
- Exceptional quality work
- Versatility, high work rates and variable width for adaptation to all conditions.

The VARI-MANAGER range is available from 5 to 8 bodies to equip tractors from 150 to 240 hp.
