

Kuhn WS 320 BIO

Description

The WS 320 BIO is a specialised energy crop shredder designed to harvest crops. With a working width of 3.23 m it also allows working in combination with a baler with a power requirement of 150 hp. The WS 320 BIO shredder specialises in harvesting energy crops or intermediate energy crops. These dedicated crops are annual or perennial crops whose main objective of their establishment and harvest is energy recovery. These crops (miscanthus, switchgrass, sorghum...) also have many associated environmental benefits such as favouring biodiversity, water purification or soil erosion prevention.
